# Methods & Collections

More than fifty years ago, Japanese violinist Shinichi Suzuki realized the implications of the fact that children the world over learn to speak their native language with ease. He began to apply the basic principles of language acquisition to the learning of music, and called his method the mother-tongue approach. The ideas of parent responsibility, loving encouragement and constant repetition are some of the special features of the Suzuki approach.

With continuous focus on bowing, tone, and expression, this method concentrates on four basic bow strokes: martele, detache, legato, and spiccato. Excerpts present melodic material for all instruments and are useful for teaching the relationship of bowing style to articulation and interpretation. Keys are presented in string order starting with D Major, and fingerings are included for all two-octave scales. Bowing and rhythmic patterns encourage the development of correlating right and left hand technique. Contains scales and various chorales.
